FOREIGN NEWS.

Egypt to be Seized and Proclaimed a Part of the British Empire,

As Soon as England Has Accumulated Enough Force at Alexandria-Succi, the Italian Faster's Wonderful Drink.

Paris, Sept. 15.—The Republique Fran-caise publishes a telegram from London which states that England meditates a grand coup d'etat, and will probably proclaim Egypt a British possession. They will, however, adds the Republique Francaise, do nothing until she has a sufficient force at Alexandria.

LONDON, Sept. 15.—Succi, the Italian faster, at Milan, will not divulge the secret of his African herb liquor, as he intends to take out a patent for it and expects to realize a few million france profit from its sale. He claims that the liquor will become a staple drink among the poor. He says it will be sold cheap, so that a large family may subsist for a week on a franc's worth of liquor. Succi is visited daily by Dukes, Princes, Senators, Deputies and liosts of foreign doctors. His strength is unimpaired.

LONDON, Sept. 15.-Cholera is gaining ground in Austria. It is worst at Lyle, a village near Agrim. Of the 000 inhabitants of the village, ninety have been stricken and twenty eight of them died alstricken and twenty eight of them died almost immediately. The people distrust the doctors and conceal the sick as iong as possible. Doctors are frequently stoned in the streets. In one house a mother and her daughter were found half naked on the bare floor, writhing in the agony of death, and in another room lay the body of the father, upon whom had been thrown the corpse of a son. The villagers are too much frightened to help one another.

Hideous Mass of Humanity.

LAS VEGAS, N. M., Sept. 15.-To-day a train of ten coaches came from the South bearing the Chiricahua and Warm Spring Apaches from the San Carlos reservation in Arizona to Florida. There were 400 of the savages, guarded by three companies of the savages, guarded by three companies of United States Infantry, under command of Colonel Wade and Major Dickie. Although none of them have been on the warpath since Geronimo broke loose, it was well understood they were furnishing his band with ammunition, and there was no telling what moment they might break out. For this reason the Government decided to ship them off to Florida, where they could do no harm. More than half of the savages are squaws and their children, and a more repulsive and hideous mass of humanity was never crowded in an emigrant sleeper before.

RIOT OVER A MARRIAGE. Desperate Affray Between Italians and

Either Side. PITTSBURGH, PA., Sept. 19.—Race hatred was the cause of a riot about one o'clock this afternoon between a number of Italian and Irish residents of the Fourteenth Ward,

this afternoon between a number of Italian and Irish residents of the Fourteenth Ward, this city. The quarrel resulted in the shooting of Patrick Constantine and the fatal injury of 'Paddy' Rocco, an Italian, whose skull was crushed with an ax. The riot was a sequel to an attack made on Joseph Vernard on Saturday evening. Vernard had incurred the wrath of his neighbors on account of his marriage to an Irish woman. On his road home he was held up against a building and terribly beaten. Vernard claimed to have recognized among his assailants Mike, John and Pat Daly. The victim dragged himself home more dead than alive. This afternoon a gang, headed by the Dalys, demanded admission to Vernard's house. On being refused admittance the doors were burst open. Then followed a scene of riot and confusion. The frightened Italians were driven in every direction by the intruders, who numbered about twenty. "Paddy" Rocco finally turned on his pursuer, Mike Daly, fighting him savagely, when one of the gang struck Rocco on the head with an axe. His skull was laid open, exposing the brain. His injuries are pronounced fatal. The prostrate form of Rocco, covered with blood, frightened the rioters, who fied. A shot was fired into the fleeing mob, and Patrick Constantine fell, the ball of a large caliber revolver baving entered his back, passing nearly through his body, and from the effects of which he died at nine o'clock to-night. It is not known who fired the shot. The police have Italians under arrest, and are now searching for the rest of the mob.

AMERICAN FARMERS.

Speaking Through the National Agricultural Association,

Approve Heartily of the Efforts in Check ing the Land Grabbers, And Urge That Care Should Be Taken in Selectlog Congressmen Not Antago-

nistic to Their Interests.

PHILADELPHIA, Sept. 15.—The American Agricultural and Dairy Association met today in their seventh annual convention in this city. Joseph H. Reall opened the convention with a long speech. He stated that the meeting was called to celebrate the most important victory every won for agriculture, the passage of the oleomargarine law; to take action toward retaining and increasing the strength of the agricultural interests in Congress and the State Legislatures, and to

take action toward retaining and increasing the strength of the agricultural interests in Congress and the State Legislatures, and to discuss the general interests of the farmers, for the purpose of adopting measures to protect and advance them. President Cleveland sent the following;

SARANAC INN., Sopt. 12, 1886.

JOSEPH H. REALL, ESQ., President, etc.—My Dear Sir: Your letter of the 3d inst, supplementing our pleasant interview and containing an invitation to attend the National Convention of the American Agricultural and Dairy Association, is received. I should be glad to accept the kind invitation tendered, and avail myself of the opportunity the convention will afford to meet the representatives of the country have in charge. The relation of this interest to the welfare and prosperity of our land is so intimate that its proper and legitimate care and protection is, in my opinion, a patrioticalty. This consideration elevates the responsibility of those in any wise instrusted with our farming industry beyond the plane of mere selfishness, and should induce conservatism and moderation. Demands made in such a spirit can not fail to exact a just and appreciative response from those who make and execute our laws. I hope that the convention may be productive of the best results to the agriculturists, as well as to all the people of our country; and though plans already made and engagements already agreed upon will prevent my accepting your invitation to be present, I shall be much interested in its objects and purposes. "Yours, sincerely," "Grover Cleveland."

Upon reassembling there was some discussion on the eleomargarine question. The Committee on Resolutions reported as follows, and the report was adopted:

sion on the oleomargarine question. The Committee on Resolutions reported as follows, and the report was adopted:

"WHEREAS. The agricultural interests and welfare of this country are the property of industrious citizens and are of the first importance, agricultural legislation, or legislation designed to promote and protect the conditions of agriculturists and shield agriculturial industries, and prevent the injuries and depressing influences resulting from the inroads of fraud, is and always will be desirable. Pherefore, be it

"Resolved, That to maintain and retain what has been secured to the farmers in the past, and to secure what may be desirable in the future, this convention, representing 8,000,000 farmers in this country in the interest of pure legislation, the prosperity of the country and the welfare of the farmer, urges for the best consideration of the farmers and people at large of the country that no man should be elected to Congress who by his past record and present reputation is antagonistic to the prosperity of the great industries of the country. And be it further

"Resolved, That we, the farmers of the United States in convention assembled, duly recognize the earnest, intelligent and effective labor of our friends in Congress in securing the passage of the elemargarine bill, and that it is the sense of this convention that such friends are entitled to and deserve the unqualified support of the farmers, regardless of party lines or affiliations.

"Resolved, That the immense interest of agriculture demand a Secretary of Agriculture, with the right and privilege of a Cabinet Minister."

Mr. Burroughs, President of the New Jersey State Board of Agriculture, offered the following, which was adopted:
"Resolved, That we hereby call upon the "Resolved, That we he

net Minister."

Mr. Burroughs, President of the New Jersey State Board of Agriculture, offered the following, which was adopted:

"Resolved, That we hereby call upon the Congress of the United States to so revise the tariff laws of the country as to protect the agricultural industries of the country by imposing such duties for the cereal and dairy product as to curtail, if not entirely stop foreign competition in these products."

The committee then offered the following additional resolutions, which were adopted:

"Resolved, In view of the injury done to the wool-growing industry of the country by the reduction of 10 per cent. ad valorem duty in 1883, the effect has been a depression of \$157,000,(60 in this product, and that industry is no longer remunerative; therefore,

"Resolved, That the earnest attention of Congress is hereby directed by this convention, and they-e-enactment of the duty charged previous to 1883 is recommended as a just protection to the agricultural pursuit of wool growing.

"Resolved, That the policy of President Cleveland and Mr. Lamar, Secretary of the Interior, through Land Commissioner Sparks, in checking land-grabbing and preventing spoliation upon our public lands, and preserving them as an inheritance to our children, meets the approbation and hearty approval of this convention."

Mr. Seymour, of New York, offered the following, which was adopted:

Philadelphia, Sept. 16.—At to-day's session a series of resolutions were passed, again stating the peculiar fitness in appealing to Congress for such legislation as will at least protect them from the necessity of competing with food products which are fraudulently manufactured and sold to the detriment of the morals and health of the people; expressing gratification at the passage of the "oleomargarine bili," and tendering thanks to the Senators and Representatives, the President of the United States and the press of the United States and the press of the Control of the Senators and Representatives referred to, "recognizing them to be friends of the people, and opposed to the encroachments of capitalized fraud," recognizing the necessity of additional legislation to perfect the bill so that its provisions may apply to the keepers of hotels and boarding houses, and to those who employ and board large numbers of men; urging Congress to consider the measure and recommending that States which have laws relating to the sale of oleomargarine to co-operate with the association.

After adopting another resolution calling upon the farmers of the United States to join agricultural and dairy societies, or, if there were none in their neighborhood, to organize them, the Convention reassembled the Committee on resolutions submitted a resolution, which was adopted, stating that the association did not confine itself to the enactment and enforcement of laws against fraudulent dairy products, but desired a revision of the land laws to prevent the public lands from falling into the the hands of corporate boddes: against food adulerations, and for a revision of the tariff and the regulation of forage immigratiou.

Our people have great reasons to hope for the early development of the riches of the Sandy Valley. Capitalists are flocking here; some with an eye to the minerals with which our hills abound, while others are looking to the prospects for utilizing the inexhaustable supply of gas which has been discovered within our regions. The disclosure of these resources is something which materially interests every individual in the Sandy Valley. Therefore, let each of us make. if necessary, some sacrifice in order that this development may be started at once.

We notice cosiderable argument between some of our exchanges over the question of whether or not the last Legislature increased the marriage license fee to two dollars. It seems that they do not all agree in their interpretation of the law. The Frankfort Capital says:

"Upon consultation with the Auditor it is learned that he has adwisorily instructed Clerks that in his opinion the fee for marriage license has been increased to two dollars, and that the fee of fifty cents which is turned in the State revenue does not have anything to do with the fee of one dollar and a WORK SHOPS half, which goes to the Clerk of the County Court as heretofore."

Senator Beck's Thoughtful Wife.

He is a warm-blooded, impulsive man, and when he spoke for twenty minutes on Saturday he was soon drenched with perspiration, and he sat down in a very uncomfortable plight. Just then a page came to his desk and told him that Mrs. Beck wished to see him in his committee room. Wondering what she wanted he went there and found her taking from a valise a change of clothing. She told him that after he had left for the Capitol she read in the morning paper that he was to speak, and knowing how hot it was she concluded to bring him a change of clothing. The cool, dry garments were soon substituted for the wet attire, and the Senator, returning to the chamber, eulogized the forethought and care of his Kentucky wife.-Albany Evening Journal.

Brother Willson and the Repubcan Committe are wildly wide of the mark in announcing Senator Sherman as the Acting Vice President of the United States. Senator Sherman, by virtue of his office as Acting President of the Senate, is no more in the line of Presidential succession than Brother Willson himself. If Mr. Cleveland should die to-day Secretary Bayard, and not Sherman, would succeed to the Presidency.-Courier-Journal.

YOUR HAIR

should be your crowning glory. Ayer's Hair Vigor will restore the vitality and color of youth to hair that has become thin and faded; and, where the glands are not decayed or absorbed, will cause a new growth on bald heads.

MAY the youthful color and vigor of the hair be preserved to old age? Read the following, from Mrs. G. Norton, Somerville, Mass.: "I have used Ayer's Hair Vigor for the past 80 years; and, although I am upwards of 60, my hair is as abundant and glossy to-day as when I was 25."

BE assured, that a trial of Ayer's Hair Vigor will convince you of its powers. Mrs. M. E. Goff, Leadville, Col., writes: "Two years ago, my hair having almost entirely fallen out, I commenced the use of Ayer's Hair Vigor. To-day my hair is 29 inches long, fine, strong, and healthy."

RENEWED and strengthened by the use of Ayer's Hair Vigor, the hair regains its youthful color and vitality. Rev. H. P. Williamson, Davidson College, Mecklenburg Co., N. C., writes: "I have used Ayer's Hair Vigor for the last ten years. It is an excellent preservative."

BY the use of Ayer's Hair Vigor, Geo.
A. Dadman, Waterloo, Mo., had his hair restored to its original healthy condition. He was nearly bald, and very gray. He writes: "Only four bottles of the Vigor were required to restore my hair to its youthful color and quantity."

USING Ayer's Hair Vigor cures diseases of the scalp. F. H. Foster, Princeton, Ind., writes: "I had been troubled for years with a disease of the scalp; my head was covered with dandruff, and the hair dry and harsh. Ayer's Hair Vigor gave me immediate relief. cleansed the scalp, and rendered the hair soft and pliable."

As a reliable remedy, in cases of Croup, Whooping Cough, or sudden Colds, and for the prompt relief and cure of throat and lung diseases, Ayer's Cherry Pectoral is invaluable. Mrs. E. G. Edgerly, Council Bluffs, Iowa, writes: "I consider Ayer's Cherry Pectoral a mest important remedy for home use. I have tested its curative power, in my family, many times during the past thirty years, and have never known it to fail. It will relieve the most serious affections of the throat and lungs, whether in children or adults." John H. Stoddard, Petersburg, Va., writes: "I have never found a medteine equal to

TYPHOID FEVER prevails almost as an epidemic in many localities of Louisville, and the physicians reported many fatal cases. The same disease prevails every year to a greater or less extent. Some of the doctors claim that it is due to the use of impure water caused by the use old, half-decayed wooden pumps, while others claim that it is due to climatic influences.

THE other evening Reuben Gray, a boy employed near Louisville, laid down on the grass and went to sleep. While he was sleeping another boy named Grant crept up to him and groaned in an unearthly manner. He was so frightened that he had ns, and on the 17th the physicians thought his recovery doubtful.

YOUNG GOULD'S MARRIAGE.

The Millionaire's Family Pleased with His Choice—Further Details of the Cer-

NEW YORK, Sept. 16 .- George Gould and his bride are not going on a wedding trip. The young couple will spend three weeks at Lindhurst, Jay Gould's summer home, after which George will buy a house in the city and attend to business as usual. There is no doubt that Jay Gould is very much pleased to see his son married. The young man's choice is in every way satisfactory to the family. Further details of the ceremony are as follows:

Miss Edith Kingdon, arrived with her

Mrs. Kingdon, the bride's mother, were the only persons present. Miss Kingdon and her mother quietly embarked at New York Tuesday noon on Jay Gould's yacht Atalanta, escorted by Mr. George GEORGE GOULD. Gould. At Irvington the party was met by Jay Gould him self with the family carriage. After the wedding a simple little lunch was spread, and the bride and her mother sat downto a half-hour's chat over the repast with the groom's family and the repast with the groom's family and Jay Gould, who had been prompt to kiss her on the instant that the preacher's cere-mony was over to a tell her health and happiness and all prosperity with the hus-band of her choice. Until seven o'clock the house remained closed, and visitors who handed in their cards were invited to call at another time. At that hour the family coach again appeared at the door. Mr. George Gould handed his newly-made wife and her mother into it, and the carriage rolled off to the depot to catch the 7:55 train.

George and his bride and mother-in-law rereturned to the city on the train, and drove directly to the residence of Mrs. Kingdon, in Thirty-Eghth street.

It is rumored that Mr. Gould and Miss Kingdon were married in London about two months ago, and that the ceremony of Tuesday last was performed to avoid disagreeable gossip about an elopement or a forbidden union. Mr. Gould was in London on a pleasure trip at the time, while Miss Kingdon was a member of Daly's company now performing in the English metropolis.

Campaign to Be Inaugurated in Ameri ca by Emissaries from Germany.

BRIDGEPORT, Conn., Sept. 16.-Dr. Edward Aveling, Fellow of the University College, London, and his wife, Eleanor Marx Aveling, the youngest daughter of Karl Marx, addressed an audience of some 2,000 people here Tuesday evening under the auspices of the Socialistic-Labor party. Dr. Aveling, as a preliminary to his ad dress, gave the following description of the Socialistic campaign in America, which Tuesday night's meeting inaugurated: This

ber of the Reichstag and one of the leaders of the Socialist party in Germany, will speak in various parts of the United States during the next three months. To the American section Dr. and Mrs. Aveling will give addresses, with the special view of recruiting their num-

bers from the many abor organizations of America Socialist agitators believe that many workmen, members of these organizations, are in principle, if not avowelly, Socialists. They hope to induce such men to openly avow their socialism, and, while by no means neglecting the objects for which the Knights of Labor, the for which the Knights of Labor, the Trades Unions, the Central Labor Union and kindred organizations work, to regard these as only the means to an end. That end, from the point of view of the Social-ists, should be the entire emancipation of labor in all lands from the domination of

England alone mports nearly or quite three million pounds sterling in value of sugared fruits and preserves from the south of Europe, annually, and this country is not behind in proportion to its size. Our common people use far more currants, raisins and preserves than the same class in England.

Well-to-do families in New York and the West are falling into the habit of keeping a handsome glass or silver dish of confections and sugared or glace fruits on a side table where people can help themselves to a sweetment "when so disposed." Incessant nibbling at good things is ruinous to health, but when exercise or business have used up the fuel of the system more rapidly than usual, a bonbon may be very profitably enjoyed.

In all South American houses of the least pretension, the cut glass and fili-basket of "delices" is as much part of the drawing-room order as flower-vases with us, and sweets are eaten with a freedom unknown at the North. Crys talized fruits appear at every meal, as regularly as the castor and salt cellar, and this use of sugared confections un-doubtedly has much to do with the better endurance of heat.

Sugar and fruits in hot countries and hot weather support the system as meat and fat foods do in cold climates. The and fat foods do in cold climates. The French troops in Algiers learn this by experience, and depend on sugared sirups to prevent sunstroke and paral-ysis on hot desert marches. TOBACCO IN FRANCE.

Quantities of the Weed Consumed in Vari-

ous European Countries. Some interesting particulars are published by M. Paul Leroy-Beaulieu with regard to the manufacture and conumption of tobacco in France. He ach, thus laying the foundation for gasquotes official figures, which show that while the quantity of tobacco grown in France itself was about 19,200 tons in 1850, it has been gradually increasing until it is now nearly double that quantity, while the revenue which the state derives from it has increased from £3,-555,000 to nearly £13,000,000. In other words, while the quantity of tobacco grown has only doubled, the profits of the state, or in other words, of the manufacturers, have nearly quadrupled. The great increase in profit is explained by M. Paul Leroy-Beaulieu upon the ground that the expense of manufacturing an additional quantity of tobacco is not any thing like that of the first establishment of plant and material. The cultivation and manufacture of to-bacco has been a Government monopoly since 1674, and, with the exception of a brief interval during the revolution, has remained so ever since. In this connection M. Paul Leroy-Beaulieu gives the following figures showing the quantity of tobacco consumed in the different countries of Europe, and the rate per

100 inhabitants is, according to him, as follows: Spain 110 pounds, Italy 128 pounds, Great Britain, 138 pounds, Russia 182 pounds, Hungary 207 pounds, France 210 pounds, Denmark 224 pounds, Norway 229 pounds, Austria 273 pounds, Germany 386 pounds, Hol-land 448 pounds and Belgium 560 pounds. In other words, while in Spain little more than one pound per head is consumed, nearly double that quantity is consumed in France, three times as much in Germany, four times as much in Holland and five times as

A Pretty Story of the Way the Great Mas ter Got a High Inspiration.

There is a pretty legend connected with the composition of the Sistine Madonna. Raphael, so the story goes, was one time painting an altar piece, which was, for the nonce, veiled from the curious gaze by green curtains while the paint was in process of drying. The artist, weary with his work, had fallen asleep before the closed hangings, but though his body slumbered his wondrous mind still wandered through the realms of fancy, and as he lay in sleep he saw the curtains open and standing between them, surrounded by myriads of cherubim, a glorious vision of the Madonna and Child. For a moment only the apparition lasted, then the painter awoke to find the curtains closed before the altar piece. Next day he re-ceived an order to paint a Madonna and Child for the Sistine Chapel, introducing Pope St. Sixtus. Raphael, still haunted by the remembrance of his dream, resolved to paint what he had seen. He sketch-ed the Madonna surrounded by angel heads, with the green curtains drawn back on both sides. St. Sixtus knelt down in adoration, his tiara resting on the altar ledge. St. Barbara occupied the other side of the painting. The picture was complete, the vision was there and the requirement of the order fulfilled. fulfilled.

Still something was wanting. The bare ledge troubled the artistic eye, till one day going to his studio he saw two boys leaning on the side looking intently at his work. He seized the happy moment and fixed them on his canvas as the adoring cherubim.-Munich Cor. Albann Jaurnal.

-Spook went up to the village postoffice the other day to have a little gos-sip with the town loafers, and when he on a platform, around which was congregated a crowd of curious observers. Upon his arrival the following conversa-tion ensued: Spook — That's a fine horse you have there, my friends, but what have you got him on that platform for? How to Drink Water.

The leading medical journal of France has published a pamphlet protesting against the extravagant use of artificial mineral waters, which, it sets forth, do the double damage of chilling the stomtric catarrh, while the limestone held in deposit in the carbonated waters finds its way to the kidneys and eventually produces Bright's disease. The pamph-let also protests against ice water as a provocative of catarrh in the stomach. It further says: "Water should be drank cool, but not leed, with the juice of a quarter or half a lemon in it. Mineral water should also be drank with a dash of lemon. Water should with a dash of lemon. Water should always be swallowed slowly. It is not the stomach which is dry, but the mouth and throat. If you toss off a drink of water you throw it through your mouth into your stomach, without doing the former any good, while you injure the latter by loading it with what it does not require. Drink slowly, and keep the water in your mouth for a moment the water in your mouth for a moment when you begin. If you work in a hot room in hot weather tie a damp cloth around your temples, and you will not experience half the craving for drink you otherwise would."—N. Y. Times.
